

Eliminating Dual Order Entry

Decrease Transcription Errors. Increase Patient Safety.

CAPS® Electronic Health Record (EHR) Interface

Designed to be transcription-free, our customized interface transfers patient information securely and helps enhance your workflow. This uniquely flexible architecture allows implementation and maintenance of an interface solution relevant to the way you do business. We combine flexible technology with nationwide implementation and support services that meet the highest industry standards for quality.

Our EHR interface leverages software and hardware components that work together to transmit Parenteral Nutrition (PN) order information from a hospital's electronic health record system to a CAPS Pharmacy through a secure, encrypted VPN connection. It's specifically designed to:

- Eliminate dual order entry
- Mitigate transcription errors that threaten patient safety
- Secure, encrypted electronic order transmission in strict accordance with HIPAA standards
- Provide easy integration of additional therapy products, such as CRRT products
- Offer 24/7 Year-round availability

CAPSLink® TPN Ordering Web Portal

This method interfaces orders from your hospital electronic medical record (EMR) system directly sent to the CAPSLink PN ordering web portal. The hospital pharmacist validates and sends the orders to CAPS using the Validate and Send to CAPS functions. ***No manual order entry is required, which supports ISMP and ASPEN PN ordering recommendations.***

Partner with Quality and Experience

CAPS® is the nation's largest network of outsourcing admixture pharmacies and a market leader in the compounding of Parenteral Nutrition. With each of our more than 200,000 local deliveries of PN annually, this high alert medication—and essential treatment option for certain patients—gets the critical double check that is recommended by ISMP.

In addition, we have services dedicated to helping hospitals, home infusion pharmacies, and surgery centers navigate the compounding regulatory environment.

Find out how CAPS can provide you with programs and services that help you focus on improving patient care. Contact us at 1-800-853-6498 or visit www.CAPSPharmacy.com.
